■ Biography

Professor Ching-Nung Yang obtained his Ph. D. degree in Electrical Engineering at National Cheng Kung University. He was awarded the degrees of B.S. and M.S. from the Department of Telecommunication Engineering at National Chiao Tung University. Professor Yang served at National Dong Hwa University since 1999. His current title is Professor in the Department of Computer Science and Information Engineering. He had been Visiting Professor at the University of Missouri Kansas City, University of Milan, and the University of Tokyo. He is currently a Fellow of IET and an IEEE senior member. Professor Yang has done extensive researches on visual cryptography and secret image sharing, and he is the chief scientist in both areas. In fact, a very important innovation "probabilistic visual cryptography" is firstly proposed by Professor Yang. His areas of interest include error correction code, multimedia security, cryptography, and information security. He has authored two books and has published over 300 professional research papers (including more than 170 SCI-indexed journal papers) in the areas of information security and coding theory. In the meantime, he has served/is serving in international academic organizations. He serves as technical reviewers for over 40 major scientific journals in the areas of his expertise and serves as editorial boards and editors of special issues for some journals. Besides, he was invited as chair, keynote speaker, and member of the program committee for various international conferences. He is the recipient of 2000, 2006, 2010, 2012, and 2014 Fine Advising Award in the Thesis of Master/Ph.D. of Science awarded by the Institute of Information & Computer Machinery.
